

TIME FOR FLY-INS

Ray Pittman, a volunteer at the Rush City Fly-In in early June, and great photographer, took a small break to capture these images of their fly-in. A reminder to all. Got fly-in pics? Send them to mnflyer@pinenet.com

Sonex Fly-In

Wayne Flury of Buffalo Municipal Airport organized a Sonex Fly-In on June 7th at his airport. The weather, par for the course this year, featured rain, rain, and more rain which lead to a few cancellations of people from Canada, North Dakota and Wisconsin that had planned to come in. Despite that, two Sonex pilots (pictured below) did make it in. In all, there were 10 Sonex builders/owners present, with seven other visitors and/or potential Sonex customers (including the 8-year old son of one builder). Flury said other fellow EAA chapter members joined the group during the day. Thanks Wayne for sending this our way!

Some of the pilots and others interested in Sonex

Ken Woodraska from Oelwein, Iowa, with his VW powered Sport Acro. He says he likes doing aerobatics and is learning more.

Bob Krueger from Alexandria, Minnesota, with his 3300 Jabiru powered Sonex. Note the gray skies and the wet ramp in both photos.
