

Notes:

This design inspired and largely copied from Sonex #1017 installation. Use at your own risk. This installation is not flying or tested yet. Dimensions should convert to fractional equivalents as needed.

Drawing does not show nutplates attached to mounting plate used to hold AOA plate in place.

Suggest making cutout in wing skin first then making AOA Mount Plate to exactly fit opening. Trim/file as needed for fit.

AOA Probe , Flush Mount for Wing Leading Edge Skin
